STABILISATION**

HP Profiles' electrical ducting is manufactured in Australia to the Australian standards. Made from rigid uPVC it is shockproof, self-extinguishing V0 (UL94) and system protection rated to IP40.

HP Profiles Electrical ducting is ideal for general electrical work requiring the concealment and protection of electrical cables. Due to its grey colour it is suitable for above ground installations where a reduction of visibility is desired from the installer or customer.

Pre-punched holes are available on certain dimensions to allow easy installation. Available from 16mm to 150mm in 4 meter lengths.

Available in 2 meter lengths on request
