

Fiber Management Tray (FMT)

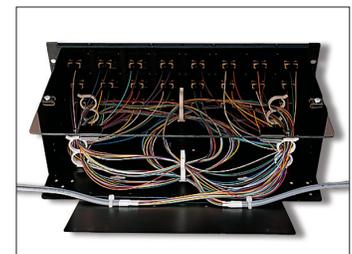

Siemon Fiber Management Trays (FMT) are an economical solution for managing fiber cable slack and splice trays. The management trays have been designed to easily retrofit any standard 1, 2, or 3 RMS CT® or MAX® series patch panel. The tray is only 254mm (10 in.) deep, allowing it to readily fit into most cabinet enclosures. A rear hinged door provides easy access to fiber management area.

Choose from a variety of flat CT couplers or MAX fiber adapters modules (for use with MAX patch panels)

The Fiber Management Tray can be used with Siemon's MAX Patch Panels for higher density fiber and multimedia applications

2 and 3 RMS trays include a rear hinged door to provide convenient access to fiber
